

CARAC' 2016 ^{3rd} Édition

26th of October 2016, Alpexpo - Grenoble, 14h à 17h

Within SEMICON Europa, **the Technology Research Institute “NanoElec”** has the pleasure to invite you on Wednesday 26 October to its session starting at 14h on the Materials Characterisation Platforms of Grenoble. The session will spotlight the application of these advanced platforms for materials analysis at the micro- and nano-scales, particularly for electronics and semiconductor technologies and how you can exploit them.

The Grenoble materials characterisation team are also at our booth (PAC-G), so stop by at any time to meet the experts to discover the complete offer of our large-scale research infrastructures for materials characterisation!
